

Process Operations (Basic)

Building essential skills for safe and effective process plant operations

ABOUT THIS COURSE

This five-day programme introduces the fundamentals of process plant operations within a high-hazard environment. Through a structured blend of theory and hands-on practice at the NCPM facility, learners gain awareness of operational procedures, equipment, maintenance skills and supervisory requirements essential for a Process Plant Operator or Technician.

WHO IS IT FOR?

Designed for those new to process operations or seeking a solid grounding in operational practice. Ideal for technicians, operators, apprentices and those progressing into plant roles.

DURATION:

5-day course
(27-31 October 2025)

LOCATION:

NCPM,
Catch Facility

 NOISES.TESTS.PUPILS

£1,100

exc. VAT

Registration and
assessments, all course materials
including workbooks, refreshments,
lunch and closing Interview

DATES:

27-31 October 2025

ASSESSMENT

Learners are assessed through observation, practical demonstration and reflective statements to show competence across operational basics, communication and safety practices.

HOW WILL IT HELP ME?

Benefits for Employers:

- ◆ Staff with practical, safe operating knowledge.
- ◆ Improved communication between field and control room.
- ◆ Strengthened compliance in high-hazard environments.

Benefits for Employers:

- ◆ Hands-on familiarity with core plant equipment and systems.
- ◆ Confidence in operational procedures and safe working practices.
- ◆ A recognised foundation for future progression in plant operations.

LEARNER OUTCOMES:

By the end of the course, participants will be able to:

- ◆ Understand operational basics and plant equipment.
- ◆ Identify and operate key field, instrumentation and control room systems.
- ◆ Demonstrate safe communication and supervisory practices.
- ◆ Apply the concept of a Safe Operating Envelope.
- ◆ Respond appropriately to emergency scenarios.
